

# BLIZZAK LM-80 EVO

## Blizzak LM-80 EVO Concept

### ULTIMATE PERFORMANCE

The Blizzak LM-80 EVO has been developed specifically to meet the high demands of today's powerful 4x4s and SUVs. To deliver the performance, safety and response your customers demand and expect. Offering outstanding handling in a variety of conditions, this tyre truly comes into its own on snow and ice as well as on wet and dry surfaces.

#### Serious grip on ice, snow and slush

Unidirectional tread with advanced lamellen design delivers **increased traction\*** Blizzak LM-80 and balanced control so you can really **power across winter surfaces.**

#### Superbly balanced wet and dry handling

Thinner, stiffer sipes boost wet and dry handling as well as maintaining snow and ice performance for **reliable braking, acceleration and cornering** thanks to thin sipe adaption.

High-volume transversal grooves clear water and slush from the contact patch for **superior wet grip** without compromising on dry performance.

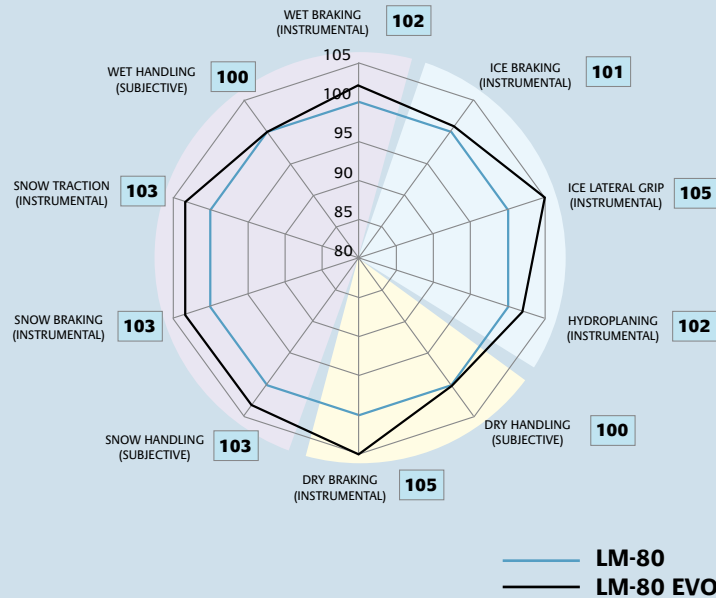

#### Reliable, efficient performance

Revolutionary winter compounds and optimised casing construction reduce tyre weight and rolling resistance for a **comfortable and economical ride.**

\*Compared to Bridgestone Blizzak LM-80

## Positioning & features

- Top class winter lamellen tyre for wide range of SUV models
- One profile matching compact and high-performance SUV's winter requirements
- Improved wet and dry handling versus predecessor (LM-80) which receive numerous appraisals from third party magazine test results
- Superior wet and grip without compromising on dry performances
