

Two out of every three cars made in Europe and North America use PPG technology

ONLY THE BEST FOR MORGAN

Timeless and elegant, each Morgan is created with passion and care using the finest quality materials. The coatings used to colour and protect our cars are important in achieving the high quality finish that is synonymous with the luxury Morgan brand.

For this reason, Morgan has for many years worked with PPG Industries, manufacturer of one of the world's leading and most respected automotive paint brands, **Nexa Autocolour®**.

As Morgan's dedicated paint supplier, PPG not only supplies the coatings applied by the craftsmen and women at the manufacturing stage but they also supply an innovative range of training and process solutions to support the complete paint and vehicle finish process.

In summary, all of the specific PPG products and services Morgan use are designed to keep each Morgan motor car in its original, pristine condition.

PPG, paint supplier of choice

With over 80 years of experience in developing automotive coatings for a number of the world's motor car manufacturers, you can be confident that PPG will meet the most demanding requirements for gloss, durability and overall final appearance of each Morgan.

As the automotive industry's first supplier of nano technology, PPG are at the forefront of advanced clearcoat technology with their CeramiClear™ product. As used on every new Morgan, this product offers the highest level of scratch resistance whilst retaining a glossy finish for much longer; as proven in numerous rigorous laboratory and demanding road tests.

Today, two out of every three motor cars made in Europe and North America use PPG technology and 'know how', making PPG the paint supplier of choice, not just for Morgan, but for many other leading motor car manufacturers.

NEXA AUTOCOLOR® is a registered mark of PPG Industries, Ohio Inc.
