COLOR: White (orig. 81 code) **INT:** Red leather **PRICE (as equipped):** \$36,290

BUILT: 30,632 Total; 10,625 Convertibles

The 1987 C-4 Corvette continued the resurgence of the American icon as a car delivering incredible value wrapped up in an impressive performance package. It also marked the second year of the return of the convertible model (gone since 1975). New roller valve lifters were made standard equipment, upping engine output from 230 to 240 hp. Even with a performance increase the '87 model also featured a higher fuel-economy rating (25 mph highway).

Two four-speed transmissions were available: manual or automatic. Standard equipment included power steering; power four-wheel disc brakes (with anti-locking); air conditioning; a theft-deterrent system; tinted glass; twin remote-control mirrors; power windows; intermittent wipers; tilt/telescope steering column; and an AM/FM seek/scan radio. This extremely well-cared-for specimen boasts only 5,200 miles on the odometer.
