## BUILT TO PERFORM LONGER

# ROADHAWK

# BUILT TO PERFORM LONGER

Performance decays over life. The longer a tyre is used and the more it wears, the more of its performance and ability it loses. That means it stops less efficiently, provides less comfort and doesn't handle as well in wet conditions.

Firestone Roadhawk challenges this rule more than most. Thanks to a unique tread pattern, specially developed compounds and tyre design, Roadhawk is built to outperform its main competitors in the wet at 20,000 km.<sup>1) 2)</sup>

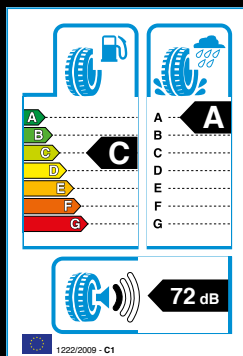

In essence this means that with Firestone Roadhawk you get best-in-class wet grip and control. Add to that the experience that comes from over 100 years of manufacturing quality tyres and you get the ideal choice for just about any kind of driving situation.

Firestone Roadhawk has received the coveted Certification Mark from TÜV SÜD, the largest independent institute for tyre and wheel technology in Europe.

## TYRE SIZE LINE-UP

Size availability »

## FEATURES

### BEST IN CLASS WET GRIP

Achieving the top "A" EU-label grade for wet grip

### BEST IN CLASS DRY BRAKING

Up to 3 meter shorter braking distance vs. its main competitors<sup>1)</sup>

### BUILT TO PERFORM LONGER

» Independently tested by TÜV SÜD, Roadhawk outperforms its competitors in the wet at 20,000 km<sup>2)</sup>

» With up to 20% better wear performance<sup>3)</sup>
