

HondaJet Ranks as Most-delivered Jet in its Category During First Half of 2017

GREENSBORO, N.C. — August 16, 2017 — Honda Aircraft Company today announced that the HondaJet was the most-delivered jet in its category for the first half of 2017, as reported by the General Aviation Manufacturers Association.

Honda Aircraft delivered 24 aircraft to customers in the U.S., Canada, Mexico, and countries in Europe during the first six months of 2017. The company is steadily ramping up production to meet customer demand, and is currently manufacturing the aircraft at a rate of about four per month at its world headquarters in Greensboro, North Carolina.

“Our customers are extremely pleased with the performance, comfort and superior fit and finish of the HondaJet. The HondaJet is very high tech, sporty aircraft and it is like a flying, high precision sports car,” said Honda Aircraft President and CEO Michimasa Fujino. “We want to create new value in business aviation and I hope to see many more HondaJets flying all over the world.”

The HondaJet is the world’s most advanced light jet, and its distinctive design incorporates advanced technologies and concepts including the unique Over-The-Wing Engine Mount (OTWEM) configuration. The aircraft is the fastest, highest-flying, quietest, most fuel-efficient, and most comfortable business jet in its class, and has gained greater acceptance in the market, especially by corporate executives, business owners, corporate flight departments, charter companies, and aviation enthusiasts.

About HondaJet

The HondaJet is the fastest, highest-flying, quietest, and most fuel-efficient jet in its class. The HondaJet incorporates many technological innovations in aviation design, including the unique Over-The-Wing Engine Mount (OTWEM) configuration that dramatically improves performance and fuel efficiency by reducing aerodynamic drag. The OTWEM design also reduces cabin sound, minimizes ground-detected noise, and allows for the roomiest cabin in its class, the largest baggage capacity, and a fully serviceable private aft lavatory. The HondaJet is equipped with the most sophisticated glass flight deck available in any light business jet, a Honda-customized Garmin® G3000. The HondaJet is Honda's first commercial aircraft and lives up to the company's reputation for superior performance, efficiency, quality and value.

About Honda Aircraft Company

Honda Aircraft Company is a wholly owned subsidiary of American Honda Motor Co., Inc. Founded in 2006, Honda Aircraft is responsible for the design, manufacturing, sales, service and support of the HondaJet. The company's world headquarters is located in Greensboro, North Carolina, the birthplace of aviation. The challenging spirit upon which Mr. Soichiro Honda founded Honda Motor Co., Ltd. is alive today as Honda Aircraft fulfills one of Honda's longstanding dreams to advance human mobility skyward.
