

# GEOLANDAR A/T-S®

**Bold, off-road attitude combined with exceptional on-road performance.**

GEOLANDAR A/T-S® all-terrain tires have an aggressive design that'll make today's trucks or SUVs stand tall. But the real beauty lies deeper. With features ranging from Multi-Stepped Grooves to Dual Interlocking Pyramid Sipes, every Geolandar A/T-S packs the absolute latest in technology to deliver long, even treadwear. Featuring an extensive size line-up, the Geolandar A/T-S, and its powerful on/off-road performance, can be experienced across a broad range of applications.

## ROUNDED-EDGE TREAD BLOCKS

Softens the contact between individual tread blocks and the ground to combat uneven tire wear and reduce noise.

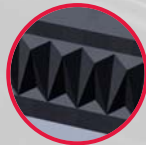

## NEW COMPOUND TECHNOLOGY

Contributes to long, even wear through the integration of silica molecules.

## DUAL INTERLOCKING PYRAMID SIPES

Maintain tread block rigidity for improved tire wear and excellent all-weather traction.

## MULTI-STEPPED GROOVES

Increase surface area of the tread to increase traction in dirt or loose gravel while simultaneously reducing tread squirm for enhanced on-road capabilities.

## LARGE TREAD BLOCKS

Mean more stability at highway speeds and enhanced handling with less noise.

## AGGRESSIVE SIDEWALL PROTECTORS

Fight off sidewall cuts and abrasions, and increase off-road bite.

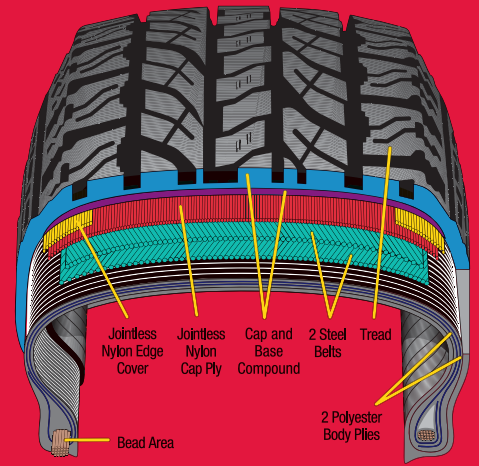

## STAGGERED CENTER BLOCKS

Create more biting edges, which improve off-road performance.

## FIVE PITCH VARIATION

Helps reduce pattern noise by varying the size and shape of the tread blocks.

Construction may vary by size and/or speed rating.
