### Premiere of the ultimate power pack: The new XM by AC Schnitzer

AC Schnitzer, the renowned tuning specialist for BMW and MINI vehicles from Aachen, proudly presents the world premiere of the impressive XM by AC Schnitzer. The result of a perfect symbiosis of technical sophistication and aesthetic elegance.

With a performance upgrade that sets new standards, AC Schnitzer raises the BMW XM to a new level. The performance upgrade catapults the system output of the XM from an already impressive 480 kW/653 HP/800 Nm to a breathtaking 552 kW/751 HP and 900 Nm. By optimising the petrol engine, this extravagant SUV achieves unprecedented performance. And best of all: the performance upgrade is offered with an assembly guarantee to ensure customers maximum safety and reliability. You can find more information at [www.ac-schnitzer.de](http://www.ac-schnitzer.de).

But that's not all, the suspension of the BMW XM has also been revised by AC Schnitzer. The AC Schnitzer suspension spring kit ensures optimum performance. With a lowering of approx. 20 - 25 mm at the front and rear compared to the standard suspension, it offers improved road holding and an even more dynamic driving experience.

The impressive looks of the BMW XM are perfected by the extensive aerodynamic conversion from AC Schnitzer. The set includes the AC Schnitzer front splitter, the front side wings, the rear roof wing and the fins for the rear diffuser. According to the principle: "Form follows function", all aerodynamic components have been consistently developed with a view to improving downforce values. They can be used individually or as a complete conversion. The appearance is rounded off by the exclusive AC Schnitzer emblems in silver or black, which give the vehicle an individual touch.

The AC Schnitzer spacer kit can be used together with the standard OEM wheels for an even sportier look with improved driving stability. The AC Schnitzer spacer kit increase the track width by 10mm per side and thus optimise the handling of the vehicle.

The overall range is rounded off by the brand new, exclusive AC5 Flowforming wheels in BiColor or glossy black. The new generation of AC5 rims was developed and produced exclusively for BMW's large SUVs. The design is unique and a new evolutionary stage of the previous double-spoke rims from AC Schnitzer. Initially recognisable by the central, pentagonal hub cap and the double spokes radiating out from it as related to the previous AC Schnitzer rims, the rim design changes drastically from the optical edge towards the rim flange to a very striking, new double Y shape.

With a size of 10.5J x 23" at the front and 11.5J x 23" at the rear, fitted with tyres of dimensions 295/35 ZR 23 at the front and 335/30 ZR 23 at the rear, the AC5 Flowforming wheels give the XM by AC Schnitzer an unmistakable look and at the same time ensure impressive performance.

In the interior, AC Schnitzer uses high-quality aluminium accents: the aluminium gearshift paddle set, the aluminium cover for the "iDrive" system controller, the aluminium pedals and the aluminium footrest underline the sporty character of the BMW XM and offer maximum comfort for the driver.

The new BMW XM by AC Schnitzer embodies the essence of performance, dynamism and exclusivity. It polarises, is absolute luxury class and a real statement.
